

CBAM Compliance Manager

Our automated solution

Our vision is to integrate all data sources into one secure, centralized system that not only compiles and allocates data for up-to-date CBAM reporting but also simplifies automated data collection from suppliers, enhancing efficiency and compliance.

The CBAM Compliance Manager capabilities:

Automatically create and submit quarterly CBAM **xml Reports**.

Standardized **simplified communication and process management controls** that enables you to request relevant CBAM data and documentation from suppliers or producers.

Automated direct and indirect emission allocation to EU imports, either through a fully automatic system-to-system interface, a batch upload or a manual entry of import and emissions data.

Reporting model and content is **kept up-to-date** and maintained by Deloitte.

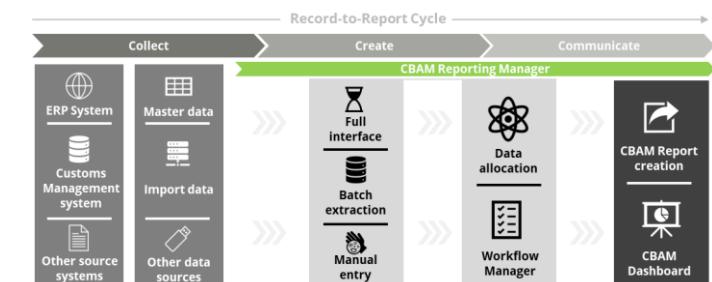

How it works? The solution:

Can run **stand-alone** or as part of a complete customs management system implementation.

Can connect to **any feeder system** and facilitates manual uploads of import data.

Provides a dashboard and **visual representations of the progress and status** of quarterly report preparations.

Allows to **prepare, file and edit** quarterly CBAM reports.

CBAM Compliance Manager

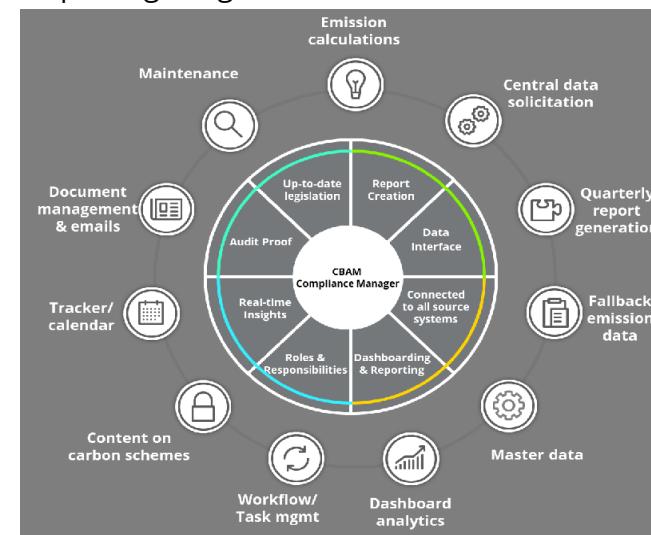

Solution is based on Deloitte's **TrackonTrade** software and connects customs data with (auto-solicited) CBAM data enriched by relevant content resulting in a compliant CBAM report.

-  Facilitates both manual data entry or interfacing
-  Automated data collection (solicitation) and allocation model
-  Centralized input of emission data by suppliers / users
-  Automatic emissions calculation based on input data or default (fallback) values in system
-  Workflow management (supplier data)
-  Automated quarterly CBAM report preparation
-  Maintained with the latest legislation by Deloitte
-  Certificate monitoring and real-time dashboarding (future functionality)

CBAM Compliance Manager can be used as a stand-alone solution or as part of the implementation of our customs management solution **TrackonTrade**.

The CBAM Compliance Manager is a digital solution that enables **EU importers to automate their CBAM reporting obligations**.

Additionally, the **Exporter portal facilitates data sharing with EU importers** by providing pre-defined, legally relevant supplier data at the product level for non-EU suppliers, thereby enabling compliance with EU CBAM reporting obligations.

Value of the CBAM Compliance Manager to the organization and business

- **Lower compliance costs** due to automation of sharing, obtaining and allocation of data and compiling the CBAM report.
- **Improved compliance** due to fully up-to-date CBAM reporting requirements.
- **Commercial advantage** of readily available CBAM data.
- **Reduced risk** of incorrect emissions reported, and audits by authorities.
- **Enhanced customer service** through the provision of relevant CBAM data via the exporter portal.
- **Education and explanations** of data elements for suppliers on data elements to be provided.
- **Full audit trail** of process and **product cost forecasting** opportunities.
